## PROFILE

Systems and Computer Networks Engineering student, passionate about technology and its ability to positively transform our daily lives. Interested in UX/UI design, focused on creating intuitive and user-friendly interfaces to enhance the user experience. I firmly believe in continuous learning and in combining technical knowledge with interpersonal skills to make a meaningful impact on every project.

## ACADEMIC PROJECTS

### RefugioSOS

March 2024 - December 2024

Role: Product Owner

Web application developed with Java, MySQL, HTML, and CSS, aimed at supporting refugees. The application helps locate shelters, access resources and essential services, manage users, and offers interactive maps to optimize humanitarian assistance.

### Hotel Buena Vista

August 2022 - December 2022

Role: Frontend Developer

Library management system that allows registration, organization, and control of book loans, optimizing library administration. Built using CSS, MySQL, HTML, and Java.

### Lectores sin Rumbo

August 2022 - December 2022

Role: Frontend Developer

Library management system that allows the registration, organization, and control of book loans, optimizing library administration. Developed using CSS, MySQL, HTML, and Java.
